

Pair of Linear Equations: Practice Worksheet

1. Solve graphically: $x + y = 5$, $2x - y = 1$
2. Solve by substitution: $3x + 2y = 12$, $x - y = 1$
3. Solve by elimination: $2x + 3y = 18$, $x - 2y = -1$
4. Find k for which the system has no solution: $kx + 2y = 5$, $3x + y = 1$
